Car Sales Analysis & Strategic Recommendations

A data-driven review of revenue, regional performance, product mix, and a roadmap to restore profitability.

C a s e S t u d y • E x e c u t i v e B r i e f i n g

Executive Snapshot

Strong top-line. A profitability problem.

Total Revenue

R7.61B

Across 974 models

Total Profit / Loss

-R88.3M

Operating at a loss

Units Sold

558.8K

Healthy sales volume

Profit Margin

-15.1%

Below break-even

Key takeaway

Bright AutoMobile is moving inventory at scale, but each sale is destroying value.

51.3% of revenue comes from low-margin deals and 47.2% from outright negative-margin deals — only a fraction of sales sit in medium or high-margin tiers. The mandate is not to sell more cars, but to sell better cars at better prices in better regions.

Which makes & models drive revenue

Ford dominates the lineup; the F-150 is the single largest revenue engine.

Top 5 Makes by Revenue

Top 10 Models by Revenue

#	Model	Revenue
1	F-150	R272.7M
2	Altima	R221.0M
3	Escape	R165.9M
4	Fusion	R159.9M
5	G Sedan	R147.9M
6	Explorer	R140.3M
7	Camry	R140.2M
8	3 Series	R137.9M
9	Edge	R110.9M
10	Silverado 1500	R107.3M

Insight: Just 10 models generate over R1.6B — concentrate marketing, financing offers, and inventory around these proven sellers.

Price, Mileage & Year of Manufacture

Older, higher-mileage stock is the source of the loss.

Newer cars = higher prices

Vehicles 0–3 years old command the strongest selling prices and the only positive profit margins in the lineup.

Higher mileage = lower price

As odometer readings climb past ~150K, selling price compresses sharply, eroding any remaining margin.

Aging inventory destroys profit

Vehicles 8+ years old consistently sit in the negative-margin band; revenue contribution from this segment is small but losses are large.

The pattern

Year ↑ Price ↑ Margin ↑ | Mileage ↑ Price ↓ Margin ↓

The dealership is buying or holding too much old, high-mileage stock that has to be discounted below cost. Profitability is a function of inventory age, not sales effort.

Where the revenue is coming from

Four states drive the majority of sales. Everything else is a long tail.

Top 4 states (FL, CA, PA, TX)

Generate the bulk of revenue — these are the volume engines.

Mid-tier (GA, NJ, TN, IL)

Stable but underdeveloped; clear growth opportunity with targeted marketing.

Long tail (OH, MO, others)

Low return per dollar of overhead; candidates for consolidation or digital-only channels.

Emerging customer preferences

What buyers are choosing — and what it means for inventory.

Revenue by Body Style

1

Sedans still lead

Combined sedan share (~37%) edges out SUVs — the family sedan remains the workhorse.

2

SUVs are #2 and growing

24.9% of revenue. Demand is shifting toward utility — stock more compact and mid-size SUVs.

3

Quarterly demand is seasonal

Q1 alone delivered R4.8B in revenue vs. R150K in Q3 — a sharp seasonal ramp into early-year buying.

4

Top brands cluster

Ford, Chevrolet, Nissan, Toyota and BMW dominate — buyers want familiar, financeable nameplates.

The profit problem, in one chart

98% of revenue is being earned on low or negative-margin deals.

■ Low Margin ■ Negative Margin ■ Medium / High Margin

51.3%

Revenue from low-margin deals

47.2%

Revenue from loss-making deals

1.5%

Revenue from medium/high margin deals

Recommendations to restore profitability

Six moves, sequenced by impact and ease of execution.

01

Re-price aging inventory

Set hard 90-day age limits. Move 8+ year, high-mileage stock through wholesale rather than retail floors.

02

Lean into proven winners

Increase F-150, Altima, Escape, Fusion and Camry stock; tie marketing spend to top 10 models that drive 20%+ of revenue.

03

Defend sedans, grow SUVs

Sedans still lead, but SUV demand is rising — rebalance procurement toward compact/mid SUVs from Ford, Toyota, Nissan.

04

Concentrate on top 4 states

FL, CA, PA, TX produce most revenue. Add finance specialists and digital ad spend there; consolidate weak locations.

05

Smooth the seasonal cliff

Q1 dwarfs Q3. Use trade-in promos, fleet deals and service-led campaigns mid-year to flatten the demand curve.

06

Margin discipline at the desk

Set minimum margin floors per deal and tie sales commissions to gross margin, not units — directly attacks the -15.1% margin.

90-day execution roadmap

From insight to a measurable margin recovery.

Days 0–30 — Stop the bleeding

- Audit inventory by age & mileage
- Wholesale 8+ year, 150K+ mile stock
- Set per-deal minimum margin floor

Days 31–60 — Refocus the lineup

- Reorder around top 10 models
- Shift mix toward Sedan + SUV winners
- Pause low-performing trims

Days 61–90 — Concentrate the market

- Double down on FL, CA, PA, TX
- Launch off-season trade-in campaign
- Move sales comp to gross-margin basis

The path forward

Sell fewer cars. Make more money.

Bright AutoMobile already has the volume, the brand mix, and the regional footprint to be highly profitable. The opportunity is not growth — it is discipline: tighter inventory, sharper pricing, and a focused regional and product strategy.
